

Y-Age Glutathione Patches

- Glutathione is the body's master antioxidant
- Supports the immune system
- Improves overall health
- Patented, proprietary form of phototherapy
- No drugs, chemicals or stimulants

A Strong Immune System is Your Greatest Defense

Glutathione is the body's master antioxidant and primary antioxidant for detoxification. It's found in nearly every human cell, and medical experts say that lifespan is directly equivalent to the amount of Glutathione in your body. With its ability to protect and detoxify, it also provides crucial immune system support. It's also worth noting that glutathione is incredibly well researched. In fact, thousands of clinical studies have been conducted on this powerful antioxidant.

As the primary defense against invaders from outside and inside the body, the importance of the immune system cannot be overstated. The good news is this patch is clinically proven to keep yours strong. No other single product can support your immune system like Y-Age Glutathione, and this patch does it all with no drugs or chemicals.

What Is Phototherapy?

The science of phototherapy, which has been around for about 100 years, uses light to improve the health of the body. And modern forms of phototherapy such as Low Level Laser Therapy, which helps reduce wrinkles in the skin, are very well understood scientifically.

But this idea is nothing new. As far back as two thousand years ago, the ancient Greeks had a center for studying the effects of different colored lights on human health. Even the ancient Egyptians, who promoted health by focusing sunlight through colored glass on certain areas of the body, understood this concept.

How Our Phototherapy Patches Work

Your body emits heat in the form of infrared light. Our patches are designed to trap this infrared light when placed on the body, which causes them to reflect particular wavelengths of light. (see Usage Tab for placement instructions). This process stimulates specific points on the skin that signal the body to produce health benefits unique to each LifeWave patch.

What Makes one LifeWave Patch Different than Another?

Each patch is exclusively designed to reflect particular wavelengths of light that stimulate specific points on the skin. This enables each patch to provide unique health benefits. No drugs or chemicals enter your body.

How Does This Relate to Immune System Support?

Y-Age Glutathione reflects particular wavelengths of light, which stimulate specific points on the skin that increase production of glutathione in the body. This helps decrease inflammation and increase antioxidant production, all of which leads to a stronger immune system.
